Grain Mill Attachment for your Champion Juicer

- Easy to install
- Clean, dust-free operation
- Durable heavy duty construction
- Simple adjustments for coarse or fine materials
- Ideal for making your own flour, corn meal, coffee and other dried grain materials.

Note

A juicer is not a healer and no juicer has any effect on the user nor the juice it extracts. But a juicer must be able to liberate the hidden values from the fibers and place them into the juice under pressure without loss by aeration or static in order to obtain the full nutritional value of such juices extracted from fruits and vegetables.

Why A Champion?

The Champion Juicer is the answer to every juicing problem. Because it operates on the mastication process, the Champion chews the fibers and breaks up the cells of vegetables and fruits. This gives you more fiber, enzymes, vitamins and trace minerals. This all results in the darker, richer color of the juice and a sweeter, richer more full-bodied flavor.

A Mastication Juicer is Better

YOU CAN SEE AND TASTE THE DIFFERENCE

As more value is extracted from a vegetable, more pigments or color are also extracted. This is why Champion prepared juice is darker and richer in color when compared to that of a conventional centrifugal-type juicer. This is true whether it is carrot juice, mixed vegetable juice or straight chlorophyll juice such as parsley juice or turnip leaf juice. You can also see it in the Champion-extracted pulp; it is pale in color.

The difference in quality is also apparent in taste. Juices extracted by a Champion are richer and offer a more full-bodied flavor.

A Champion Is Simple to Use

Designed for simplicity, the Champion doesn't require nuts, bolts, screws or clamps to assemble. The floating cutter just slides on or off the shaft; a quick half-turn and the body locks on or releases for removal. By changing a single part the juicer is now a *homogenizer*. It's so simple and all the parts are easy to clean.

The Champion Is Versatile

In addition to extracting vegetable juices, the unit can make coconut milk, baby foods, fruit sauces, nut butters, ice creams and sherbets. No other juicer can do this.

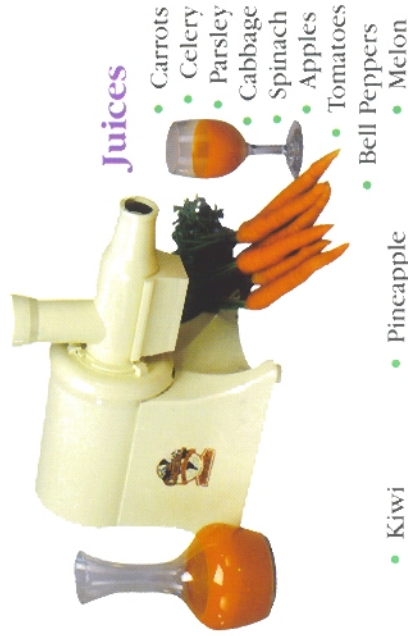

A Champion Is Durable

Powered by a full 1/3-horsepower, heavy-duty General Electric motor, the Champion Juicer is powerful, durable and built to last. All juicer parts are made from 100 percent FDA accepted nylon and stainless steel. The Champion's body is lined with a special stainless steel which is almost wear-free and will not pick up food odor. Special heavy-duty, variable, 110/220 volt, 50/60 hertz motor with stainless steel shaft, ideal for juice bars, restaurants or overseas operations, is also available at extra cost.

A Champion Offers ...

- Large Feeding Chamber—1 3/4 inches in diameter; able to take large vegetables without cutting them into smaller pieces.
- Floating Cutter—designed to separate the juice from the pulp in a continuous operation. No intermittent cleaning required.
- Tempered Stainless Steel Cutting Blades—the blades are cast into the cutter for strength and durability. They *never* separate, rust, twist, tarnish or easily become dull.

WARRANTY: 5-YEAR LIMITED WARRANTY. One year on motor, four additional years on juicing parts.

Juices

- Carrots
- Celery
- Parsley
- Cabbage
- Spinach
- Apples
- Tomatoes
- Bell Peppers
- Melon
- Kiwi
- Pineapple

CELERY AND LEMON COCKTAIL DELIGHT

- 2 peeled lemons
- 1 handful of tender celery leaves
- 1/2 cup raw sugar

Juice the celery leaves, then the lemons. Stir in the sugar, add water to make one quart. Serve with ice cubes.

Homogenizes

- Nut Butters
- Fruit Sauces
- Baby Foods
- Sorbets
- Ice Creams
- Sherbets
- Purees
- Salsa
- Muesli

FROZEN BANANA DESSERTS

- 4 ripe banana (cut in half and frozen without skins).

Assemble the Champion for homogenizing and homogenize the frozen bananas. Serve at once. Makes 4 servings.
